Dmytro Nesterenko

backend developer

My name is Dmytro Nesterenko, I'm 17 years old and I am a passionate backend developer with expertise in web development and backend technologies. My tech stack these days: Golang, Node.js, JavaScript, TypeScript, Elixir, also had a short experience with c/c++/python/lua. Also can be full stack developer, but i don't like it, but if i need - i can, I'm interested in backend stuff and want to position myself as a backend developer. I'm a freelancer these days.
